

CAN YOUR WIRE WITHSTAND THE MOST SEVERE WINDING PROCESSES?

De Angeli developed new Aluminium magnet wires, specifically designed for the toughest winding processes.

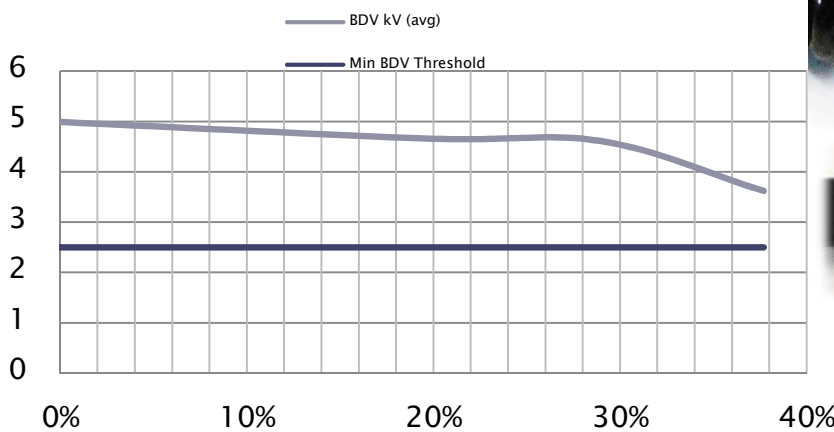

Our technology allows ADHEXAL to **guarantee dielectrical properties according to IEC standards even after flattening**, for section reductions up to 35%. To help you reducing your machine size where needed

Comparison tests with other enameled wires shown the superior performances of ADHEXAL products.

Wire from other supplier on 2xd winding and after 35% flattening - KO

BDV Decay after flattening
