ABSTRACT

Through our experience on conductors for winding machines, we extended our production range towards generous dimensions, exceeding the suggested width/thickness ratios for flat wires.

INTRODUCTION

We introduce in our portfolio a wide range of new bare round and flat conductors, suitable as connectors and for mechanical usage.

AVAILABLE DIMENSIONS

Round wire: Up to 18 mm

Flat wire: up to 30 mm width

w/t ratio: up to 20:1 – higher ratios on request

ENGINEERING

The experience of our technicians, focused on different production technologies to reach new limits to improve our customer experience, also for basic products.

We can propose different solutions in term of metal hardness: from fully annealed products to hard copper, following the requirements of each customer.

CONCLUSIONS

Our experience and the quality of our products on such an extended portfolio is the right choice for those who need to develop special solutions, for out-of standard.projects.
